KVG Quartz Crystal Technology GmbH

We use our Integrated Management System for quality (WissIntra®), economic responsibility, ecological sustainability, health and safety, and environmental protection. We are committed to continuous improvements in our performance and all our activities. KVG is certified in accordance with EN 9100, ISO 9001 and ISO 14001.

We are fully committed to sustainable development, a principle that is an integral part of our business thinking and practices. A manufacturing company, KVG continuously optimizes each process sustainably in order to conserve resources and minimize waste. Further goals are to save energy as efficiently as possible in an environmentally compatible way. The perpetual search for ways to improve production facilities and processes, along with intelligent production loops, have reduced KVG’s emissions. Our integrated management system (IMS) infuses the sustainability ethos into all operating processes and serves as a tool for evaluating and monitoring “environmental quality” within the company.

ECONOMIC RESPONSIBILITY

Long-term success requires a company to focus on the building blocks of sustainable economic, ecological and social development as well as a standardized system of control. This body of rules governs the totality of workflows, responsibility and accountability within the context of our products, quality, health, safety and environmental protection. Sustainability at KVG is based on an integrated management system (IMS). The IMS is founded on legislation, voluntary commitments, responsible acting as well as national and international standards.

ECOLOGICAL SUSTAINABILITY

Ecological sustainability is not just an issue for today and tomorrow. As a manufacturing company, KVG continuously optimizes each process sustainably in order to conserve resources and minimize waste. Further goals are to save energy as efficiently as possible in an environmentally compatible way.

The perpetual search for ways to improve production facilities and processes, along with intelligent production loops, have reduced KVG’s emissions. Our integrated management system (IMS) infuses the sustainability ethos into all operating processes and serves as a tool for evaluating and monitoring “environmental quality” within the company.

CHALLENGE

Standing on our own two feet: cash makes us self-reliant.

PROBABILTY

Profit is good we can only spend what we have earned.

VALUE CREATION

Sustaining and enhancing value: our efforts must pay off for everyone.

November 2016 – Corporate Management

Vision

We believe that, at long term, technology and products of KVG make a vital contribution to global progress and sustainable development of communication.

In the future, social and economic success will rest more than ever on worldwide collaboration and interconnected skills – this is especially true for cooperations with customers. Flexible and specialized units like KVG will therefore profit the most from the opportunities available today and tomorrow.

Mission

KVG is a technology leader in the Frequency Control Product Industry. Pushing ahead with technical innovations and the development of new products for the world’s key industries of communication.

In this way, KVG helps improving people’s lives. KVG is organized as a high specialized unit with absolute responsibility. This gives us the necessary flexibility and reach. Everything we do is conducive to global networking and cultural integration.

Responsibility for Employees

Social responsibility in a company primarily means responsibility for employees. They are our most important resource and crucial for the company’s success. For them, we create a pleasant working climate in which each individual can develop.

Basic and advanced training is an important tool for fostering our employees’ awareness of the importance of observing our business principles.

Employees are aware of the concerns and needs of the communities and environments in which our company operates.

They are committed to continuous improvements in their performance and all their activities. KVG is certified in accordance with EN 9100, ISO 9001 and ISO 14001.

By preventive actions, failure analysis and internal auditing we continuously improve our performance.

Economic Responsibility

Long-term success requires a company to focus on the building blocks of sustainable economic, ecological and social development as well as a standardized system of control. This body of rules governs the totality of workflows, responsibility and accountability within the context of our products, quality, health, safety and environmental protection.

Sustainability at KVG is based on an integrated management system (IMS). The IMS is founded on legislation, voluntary commitments, responsible acting as well as national and international standards.

Corporate Goals

Our mission is embodied by goals that set our standards.

Customer Focus: Serving customers in our business: we must offer sustainable solutions for today and tomorrow.

Employees: Promoting excellence: we need and want the best.

Sustainable Management: Focusing on tomorrow’s generation: we cannot afford to mismanage our future.

Working together: Building on our strengths: we want to safeguard and extend our competitive lead.

Market Share: Competition stimulates business: we are out to win, not just to perform well.

Sales / Growth: To grow is to succeed: we must see growth as a chance for everyone – however “not at any price”.

Innovation: Amiring high R&D secures our future.

Cash Flow: Standing on our own two feet: cash makes us self-reliant.

Protability: Profit is good we can only spend what we have earned.

Value Creation: Sustaining and enhancing value: our efforts must pay off for everyone.
